

Since incorporation in 1984, Control Resources, Inc., has become the leading OEM supplier of fan and blower speed controls and alarms to the electronics and HVAC industries. SmartFan controls and alarms are used in a wide range of products including file servers, storage subsystems, telecommunications, ATE, medical, and HVAC products.

SmartFan provides these important benefits:

- ◆ *Acoustical noise reduction*
- ◆ *Energy savings*
- ◆ *Greater product reliability*
- ◆ *Increased fan life and improved safety*

Our greatest strength is the ability to adapt to individual customer needs. In addition to the standard line of controls and alarms that are shown in this catalog, we can provide complete custom design and engineering services, including the following:

- Design and production of special and custom products to meet specific requirements
- Provide recommendations for fan/blower selection
- Perform tests or work with the fan/blower manufacturer to confirm system operation
- Assist with sheet metal or enclosure manufacturer selection

*Thank you for your interest in SmartFan Products. Our engineering staff is ready to work with you on any fan control and alarm requirement. We encourage you to contact us early in the design phase of your system to ensure the best possible solution for your application. Whatever your needs, you can expect prompt, accurate and courteous service from Control Resources.*
